TECHNICAL SKILLS

Programming Languages: Typescript/Javascript, Java, PHP, Python, HTML, CSS, SQL

Frameworks: NestJS, Next.js, React, NodeJS, ExpressJS, Jest, Tailwind, Axios, Swagger

Tools and Platforms: Git, GitHub, GitHub Actions, Linux, VSCode, Cursor, Docker, AWS Cloud Services

EXPERIENCE

COMELEC - Saint Louis University

Full-Stack Web Developer

Baguio City, PH

Aug 2025 – Present

- Maintained a Voting System built with vanilla **HTML**, **CSS** and **PHP** to ensure application stability and readiness before each election period.
- Extended the **MySQL** database schema to support additional system functionalities based on stakeholders' requests and fixed legacy bugs found in the system.
- Migrated the deployment pipeline to **GitHub Actions**, using **Docker** and **AWS EC2** for improved uptime and reliability.
- Created an automated database backup script running via cron job every 30 minutes to ensure data is backed up intended for manual validation.

Old.St Labs

Full-Stack Developer Intern

London, UK

June 2025 – Aug 2025

- Developed serverless full-stack applications using **Next.js** and **NestJS**, including a recipe app and a book-author API.
- Implemented microservices architecture with **Nx Workspace**, **NestJS**, **AWS DynamoDB**, and **AWS SQS** for scalable, event-driven systems.
- Gained practical experience in implementing clean backend architecture using layered design with controllers, services, and database layers using **NestJS** and **Nx Workspace**.
- Collaborated on an internal Task Tracker app, integrating **OpenAI**, **Slack**, **ClickUp** and **Clockify webhooks**, with automated notifications running on **Convex** cron jobs and unit tests done in **Jest**.

COMELEC - Saint Louis University

IT Tech Support

Baguio City, PH

July 2024 – Oct 2024

- Provided technical support for over 500 students during university-wide elections, ensuring system uptime.
- Diagnosed and resolved hardware/software issues and bugs, minimizing downtime during the election.
- Oriented 20+ volunteers on the voting system, improving operational efficiency.
- Monitored system performance and generated detailed post-election reports for system improvements.

RECENT PROJECTS

Cramble | Typescript, Node.js, NestJS, Next.js, Nx Workspace, Prisma, Clerk Auth, AWS Cloud Services

- Developed a full-stack flashcard web application using NestJS and Next.js, enabling users to create, manage, and track study materials.
- Implemented microservices and clean architecture with Nx Monorepo, leveraging AWS Lambda, RDS, SQS and S3 for scalable system design.
- Designed UI prototypes in Figma and built responsive interfaces using ShadCN and TailwindCSS.
- Integrated the Gemini API for automatic quiz generation from text inputs.
- Managed user authentication and authorization through Clerk for secure access control.

Lumina | Typescript, Node JS, Next.js, Fast API, Artificial Intelligence, Convolutional Neural Network

- Developed a full-stack application as a proof of concept for an AI model that classifies non-small cell lung cancer subtypes using CT and PET scans.
- Built the frontend with Next.js and the backend with FastAPI to support model integration and visualization.
- The corresponding research paper was accepted for presentation at the Medical Imaging and Computer-Aided Diagnosis Conference in London, UK.

EDUCATION

Saint Louis University

Bachelor's Degree in Computer Science.

Current GWA: 94.91% | DOST-SEI Scholar | Summa Cum Laude Candidate

Baguio City, PH

Expected July 2026
